Describing the dataset

Describing the dataset

Here you should describe the dataset

What was to be found

What was to be found

Here you should tell me what was to be found in the dataset:

- What was interesting?
- what did you find out when investigating

The story

What happened, in your opinion?

Here you should tell me the story behind, what do you think it happened

- Show some graphs
- Show the results

The analyis

The analysis

Here you should tell me how did you perform the analysis.

- How you built the dataset
  - ▸ How did you group?
- Show me you regression(s) tables
- Explain the coefficients

The Conclusion

What do you conclude from this?

1. What happened?
2. What did it bring?
3. Was it useful, in your opinion?

Notes

Notes

This is a general guideline, feel free to add whatever you think is necessary.
